

S-911 Personal Locator

The **S-911 Personal Locator** can be used as an emergency mobile phone with speed dialling for two-way voice communication, it can silent call 999 or any emergency number in the world for immediate assistance with personalized voice to report location and time stamp.

The S-911 can send SMS messages to a control centre and can also be monitored real time on internet. The S-911 has a unique Geofence feature which can be used to report to authority or control centre when the object is out of the pre-defined area.

It's also ideal for lone worker security, care of the elderly, home arrest, law enforcement vehicle tracking and fleet control. The S-911 has a built in high sensitivity GPS receiver which can provide indoor and under bridge location capability where normal GPS is unable to do so. The S-911T's main goal is to provide help for critical situations where immediate assistance is a must.

This portable device is exclusively available from Communic8 and measures 100 x 45 x 25 mm and has a built in Lithium Ion rechargeable battery.
